## Web Developer (full stack)

Moscow, Russia

<https://github.com/avbmoons>

[evb.moons@gmail.com](mailto:evb.moons@gmail.com)

<https://avbmoons.github.io>

I'm a web developer. I have experience of approximately two years in website development. Besides, I have been involved in IT for a considerable period engaging in business and system analysis, designing modules, systems, and websites. I am now capable of implementing the designs I create into actual code.

## Skills

### Front:

HTML

CSS

SASS

JavaScript

### Back&DB:

PHP

Laravel

MySQL

PostgreSQL

### Services&Design:

GitHub

Docker

VSCode

Figma

### Manage&Analysis:

Confluence

Trello

YouGile

PowerDesigner

## Projects

### News parsing project

<https://avbmoons.github.io/newsfront/index.html>

Parsing news by category from official sources. The front part has been developed in the project. Also the administrator interface has been developed for information management and analysis.

Implementation of the full version with the back-end on Laravel in a Docker container.

The interactive design layout of the website has been developed:

[News&Trends](#)

### Flowers e-shop project

<https://avbmoons.github.io/flowers/index.html>

The front part has been developed in the project of the online floristry store. The demo version contains the main pages of the website with the function of creating a shopping cart and an order form.

Implementation in Html5, Css, and native JavaScript. There is also a VueJS version.

The updated interactive design layout of the website has been developed:

[Flowers](#)

### Interior e-shop project

<https://avbmoons.github.io/market/>

The front part has been developed in the project of the online store of interior items. The demo version contains the main pages of the website with the function of creating a shopping cart.

Implementation in Html5, Css, and native JavaScript.

The updated interactive design layout of the website has been developed:

[InteriorMasters](#)

### Food delivery e-shop project

<https://avbmoons.github.io/delivery-food/>

The front-end has been developed in the project of an online food delivery store. The demo version contains the main pages of the website with the

function of creating a shopping cart and an order form.  
Implementation in HTML5, CSS, and native JavaScript.  
The updated interactive design layout of the website has been developed:

## Experience

Jun'23 – to date	Freelance, project activities	Web-developer
Jul'21 – Apr'23	GeekBrains	Web-developer
	Implementing some personal and team developing projects.	
Aug'11 – Sep'19	Some Russian IT-companies, such as Altairix (Dec'16 – Apr'20), Lanit (Apr'14 – Oct'16), Quarta (Aug'11 – Mar'14)	Analyst
	Setting tasks for software development on companies' projects, also coordination with customers and management for the analysts and developers groups	

---

## Education

Jun'24 - Aug'24	GK Consultant (advanced training)	Web-designer
Jul-21 – Apr'23	GeekBrains	Web-developer, Web-development department
Sep'04 – Jun'07	The Russian Presidential Academy of National Economy and Public Administration	Informatics Specialist and Economist, Economics Department

---

## Some about

I have been working in IT for a long time, engaged in business and system analysis, I have designed systems, modules, websites. Now I'm designing, creating design layouts and implementing them in code.

I write native HTML layout and JS scripts, I prefer Sass for developing styles. I work with VueJS and ReactJS projects. I prefer to develop the backend in Laravel with MySQL and PostgreSQL databases. I can also work with native PHP. I work in Docker and Ubuntu. I use Figma to create design layouts.

I can also organize project work for a small group in Trello, YouGile, Jira, maintain a common repository on GitHub, present projects and project results.

I'm trying to develop my skills and looking for projects where I can be useful and apply my experience.

You can view several of my personal projects on my digital portfolio at the link <https://avbmoons.github.io>. Demo versions of resources are presented.
